Decay shape analysis — P(significant) vs distance
Straight line on each plot indicates that functional form fits the data
Log-linear → Exponential decay
P ∝ e^(−λd)
Data
Linear fit R²=0.854
log P
Distance (μm)
Log-log → Power law
P ∝ d^(−n)
Data
Linear fit R²=0.654
log P
log Distance
Linear-log → Logarithmic decay
P ∝ −log(d)
Data
Linear fit R²=0.598
P
log Distance
